

TechNova Solutions Pvt. Ltd.

Annual Project Handbook — FY 2025–26

Synthetic project portfolio created for Enterprise RAG testing. All projects, clients, budgets, teams, timelines, technologies, and performance figures are fictional.

1. Annual Portfolio Summary

Portfolio Metric	FY 2025–26
Total Projects	18
Completed Projects	11
Projects In Progress	5
Cancelled / Deferred Projects	2
Total Portfolio Budget	■42.6 Crore
Actual Spend	■39.1 Crore
Projects Delivered On Time	8 of 11 completed
Major Product Releases	6
Enterprise Client Projects	7

2. Project Portfolio by Type

Project Type	Number	Purpose
SaaS / Enterprise Product	4	Build or enhance cloud business products.
AI / Machine Learning	3	Develop AI assistants, RAG, and predictive systems.
Data & Analytics	2	Data platforms, dashboards, and reporting.
Mobile Applications	2	Customer and employee mobile applications.
Cloud / Infrastructure	2	Cloud modernization and platform engineering.
Cybersecurity	2	Security monitoring and identity improvements.
Internal Automation	2	Automate internal business workflows.
API / Integration	1	Integrate enterprise systems and external services.

3. Annual Project Register

ID	Project	Type	Status	Budget
TN-001	NovaCRM Cloud	SaaS	Completed	■4.2 Cr
TN-002	InsightAI Assistant	AI/ML	Completed	■3.5 Cr
TN-003	DataLake Modernization	Data	Completed	■3.1 Cr
TN-004	TechNova Mobile	Mobile	Completed	■2.4 Cr
TN-005	CloudShift 2.0	Cloud	Completed	■3.8 Cr
TN-006	SecureID	Security	Completed	■2.1 Cr
TN-007	WorkflowX	Automation	Completed	■1.8 Cr
TN-008	SupportBot	AI/ML	Completed	■1.5 Cr
TN-009	Partner API Hub	Integration	Completed	■1.2 Cr
TN-010	Sales Analytics	Data	Completed	■1.7 Cr

ID	Project	Type	Status	Budget
TN-011	Employee Connect	Mobile	Completed	■1.1 Cr
TN-012	NovaERP	SaaS	In Progress	■5.6 Cr
TN-013	RAG Enterprise Search	AI/ML	In Progress	■2.9 Cr
TN-014	Zero Trust Network	Security	In Progress	■2.2 Cr
TN-015	Kubernetes Platform	Cloud	In Progress	■2.6 Cr
TN-016	ProcureFlow	Automation	In Progress	■1.3 Cr
TN-017	SmartForecast	AI/ML	Deferred	■1.4 Cr
TN-018	Customer Portal Next	SaaS	Cancelled	■2.2 Cr

TN-001 — NovaCRM Cloud

Type	SaaS / Enterprise Product
Status	Completed
Timeline	Apr 2025 – Dec 2025
Budget	■4.2 Cr
Team Size	48 engineers
Technology	React, TypeScript, Python, FastAPI, PostgreSQL, Redis, Docker

Project Description: A cloud-based customer relationship management platform for sales teams. The project delivered lead management, customer profiles, sales pipelines, dashboards, role-based access, and API integrations.

TN-002 — InsightAI Assistant

Type	AI / Machine Learning
Status	Completed
Timeline	May 2025 – Jan 2026
Budget	■3.5 Cr
Team Size	31 engineers
Technology	Python, FastAPI, PostgreSQL/pgvector, embeddings, LLM APIs, React

Project Description: An enterprise AI assistant that answers questions using approved company documents. The project introduced document ingestion, chunking, embeddings, vector search, access filtering, and LLM response generation.

TN-003 — DataLake Modernization

Type	Data & Analytics
Status	Completed
Timeline	Apr 2025 – Nov 2025
Budget	■3.1 Cr
Team Size	27 engineers
Technology	Python, SQL, object storage, ETL pipelines, PostgreSQL, dashboards

Project Description: Modernized the company's analytics platform by consolidating operational data into a central data platform and improving reporting pipelines.

TN-004 — TechNova Mobile

Type	Mobile Application
Status	Completed
Timeline	Jun 2025 – Feb 2026
Budget	■2.4 Cr
Team Size	22 engineers
Technology	Flutter, REST APIs, PostgreSQL, push notifications

Project Description: Customer mobile application providing account management, notifications, support requests, and product activity dashboards.

TN-005 — CloudShift 2.0

Type	Cloud / Infrastructure
Status	Completed
Timeline	Apr 2025 – Oct 2025
Budget	■3.8 Cr
Team Size	35 engineers
Technology	Docker, Kubernetes, Terraform, cloud services, Prometheus, Grafana

Project Description: Migrated selected workloads to a standardized cloud platform and introduced containerized deployment, automated infrastructure, monitoring, and disaster recovery procedures.

TN-006 — SecureID

Type	Cybersecurity
Status	Completed
Timeline	Jul 2025 – Dec 2025
Budget	■2.1 Cr
Team Size	19 engineers
Technology	OAuth 2.0, OIDC, MFA, PostgreSQL, security monitoring

Project Description: Introduced centralized identity management, stronger authentication, role-based authorization, access reviews, and security audit reporting.

TN-007 — WorkflowX

Type	Internal Automation
Status	Completed
Timeline	Aug 2025 – Dec 2025
Budget	■1.8 Cr
Team Size	17 engineers
Technology	React, FastAPI, PostgreSQL, Redis, REST APIs

Project Description: Automated internal approval workflows for procurement, finance requests, employee operations, and management approvals.

TN-008 — SupportBot

Type	AI / Machine Learning
Status	Completed
Timeline	Sep 2025 – Feb 2026
Budget	■1.5 Cr
Team Size	15 engineers
Technology	Python, RAG pipeline, embeddings, LLM API, PostgreSQL

Project Description: An AI-powered support assistant that retrieves approved product documentation and support procedures before generating answers.

TN-009 — Partner API Hub

Type	API / Integration
Status	Completed
Timeline	May 2025 – Sep 2025
Budget	■1.2 Cr
Team Size	12 engineers
Technology	FastAPI, PostgreSQL, Redis, API gateway, Docker

Project Description: Created a centralized API integration layer for external partners, authentication, request validation, logging, and API monitoring.

TN-010 — Sales Analytics

Type	Data & Analytics
Status	Completed
Timeline	Oct 2025 – Feb 2026
Budget	■1.7 Cr
Team Size	14 engineers
Technology	Python, SQL, PostgreSQL, BI dashboards

Project Description: Built dashboards for revenue, customer acquisition, sales pipeline, regional performance, and conversion analysis.

4. Projects In Progress

Project	Objective	Expected Delivery
NovaERP	Unified enterprise resource planning platform covering finance, production, inventory, and operations.	Dec 2026
RAG Enterprise Search	Secure enterprise document search and AI question-answering platform with company-level access controls.	Nov 2026
Zero Trust Network	Modernize identity, device trust, network access, and security monitoring.	Oct 2026
Kubernetes Platform	Create an internal platform for standardized container deployment and service operations.	Sep 2026
ProcureFlow	Automate procurement requests, approvals, purchase orders, and vendor workflows.	Aug 2026

5. Deferred and Cancelled Projects

TN-017 SmartForecast: Deferred because the required historical data quality was not sufficient for reliable model evaluation. The project is planned for reconsideration after the data modernization program.

TN-018 Customer Portal Next: Cancelled after product strategy changed. Existing customer portal functionality will be maintained while resources are redirected to NovaERP and the mobile platform.

6. Portfolio Performance

Metric	Result
Completed projects	11
Completed on schedule	8
Completed with minor schedule delay	3
Projects over budget	2
Projects meeting primary objectives	10 of 11
Major production incidents during project releases	1
Projects using automated CI/CD	14
Projects using containerization	13

7. Project Governance

- Every project receives a unique project ID and an approved project brief.
- The project brief records objectives, scope, expected benefits, budget, resources, risks, dependencies, and project type.
- A project manager is responsible for delivery coordination, schedule tracking, status reporting, and risk management.
- Major projects have a steering group consisting of business, product, engineering, finance, and security representatives as appropriate.
- Budget and scope changes require documented approval according to project governance rules.
- Project status is reviewed monthly by the portfolio management team.

8. Suggested Enterprise RAG Questions

- How many projects did TechNova have during FY 2025–26?
- How many projects were completed?
- How many projects are currently in progress?
- What types of projects did the company undertake?
- What was the budget of the InsightAI Assistant project?

- Which project focused on cloud modernization?
- What technologies were used in the RAG Enterprise Search project?
- Why was SmartForecast deferred?
- Why was Customer Portal Next cancelled?
- Which project had the largest budget?
- How many projects used automated CI/CD?
- How many completed projects were delivered on schedule?
- What was the objective of NovaERP?
- Which project introduced centralized identity management?
- What was the purpose of Partner API Hub?
- How many engineers worked on NovaCRM Cloud?
- Which project was responsible for internal procurement automation?
- What was the total portfolio budget for FY 2025–26?

Dataset classification: Synthetic / Dummy Data. Designed for testing document retrieval, multi-document reasoning, metadata filtering, chunking, embeddings, and LLM-based answers.
